| Competency Standard | 9 |
| Referenced documents..... | 12 |
| Introduction | 12 |
| Industry Case Studies | 12 |
| Definitions and Terminology..... | 13 |
| 1. Prepare for laboratory-based acceptance tests | 17 |
| 1.1 Access relevant job instructions from Laboratory Quality Manual (LQM) | 19 |
| 1.1.1 <i>Underpinning governance</i> | 19 |
| 1.1.2 <i>What is a Standard?</i> | 19 |
| 1.1.3 <i>Document control</i> | 20 |
| 1.2 Interpret test request to confirm samples to be tested, the test method and equipment involved | 21 |
| 1.2.1 <i>Test Request form</i> | 21 |
| 1.2.2 <i>Sample Register</i> | 31 |
| 1.2.3 <i>Worksheets</i> | 32 |
| 1.3 Check the accuracy and completeness of accompanying labels and documentation to ensure traceability | 36 |
| 1.4 Identify hazards and enterprise controls associated with the sample, preparation methods, reagents and/or equipment | 36 |
| 1.4.1 <i>Using personal protective equipment</i> | 38 |
| 1.5 Assemble all required equipment and materials. | 39 |
| 1.6 Plan work sequences for optimum efficiency and/or throughput of multiple samples | 43 |
| 2. Prepare samples or test pieces..... | 47 |
| 2.1 Prepare samples or test pieces | 49 |
| 2.2 Check that the storage/curing conditions of samples and/or test pieces were appropriate | 49 |
| 2.3 Compare samples and/or test pieces with test specifications, record observations and report discrepancies..... | 50 |
| 2.3.1 <i>Non-conformance reporting</i> | 50 |
| 2.4 Prepare samples and/or test pieces in accordance with appropriate test method | 52 |
| 2.4.1 <i>Sample Divider – Riffle Splitter</i> | 52 |
| 2.4.2 <i>Sample preparation requirements</i> | 53 |
| 2.5 Check test equipment before use | 55 |
| 2.6 Set up equipment in accordance with test method | 56 |
| 2.7 Perform pre-use and safety checks in accordance with enterprise procedures | 58 |
| 2.8 Identify faulty or unsafe equipment and report to appropriate personnel | 58 |
| 2.9 Check calibration status of instruments and report any out of calibration items to appropriate personnel..... | 59 |
| 2.9.1 <i>Laboratory Equipment Register</i> | 60 |

| | | |
|-----------|---|------------|
| 3. | Perform laboratory tests..... | 63 |
| 3.1 | Conduct tests in accordance with test method and enterprise procedures | 65 |
| 3.2 | Record data and observations in accordance with enterprise procedures | 65 |
| 3.2.1 | <i>What are the best ways to enter your data?.....</i> | 65 |
| 3.2.2 | <i>What do you do if you make a mistake when entering data?.....</i> | 66 |
| 3.3 | Testing methods..... | 67 |
| 3.4 | Particle Size Distribution | 67 |
| 3.4.1 | <i>What is a particle size distribution test?</i> | 67 |
| 4. | Typical Tests in accordance with Australian Standards | 73 |
| 4.1 | AS 1289.2.1.6—2005 Method: 2.1.6: Soil moisture content tests | 73 |
| 4.2 | AS 1141.11.1 – 2009 Method 11.1: Particle size distribution—Sieving method..... | 75 |
| 4.3 | AS 1141.15 – 1999 Method 15: Flakiness index | 81 |
| 4.4 | AS 1141.30.1—2009 Method 30.1 Coarse aggregate quality by visual comparison. (Unsound stone)..... | 86 |
| 4.5 | AS1141.20.3 – 2000 Method 20.3: Average least dimension Calculation (nomograph)..... | 93 |
| 4.6 | Recognise obvious errors or atypical data and take appropriate corrective actions..... | 97 |
| 4.7 | Perform calculations as set out in test method | 98 |
| 4.8 | Compare calculated results with expected values and report atypical results promptly to appropriate personnel..... | 98 |
| 4.8.1 | <i>Common Calculations.....</i> | 99 |
| 4.9 | Complete technical/administrative records and test reports in accordance with enterprise procedures..... | 99 |
| 4.9.1 | <i>Maintain enterprise Confidentiality standards.....</i> | 100 |
| 4.10 | Seek advice to deal with any situation beyond own technical competence..... | 100 |
| 5. | Maintain a safe work environment | 103 |
| 5.1 | Use safe work procedures and protective equipment to ensure personal safety and that of others..... | 105 |
| 5.2 | Minimise generation of wastes and environmental impacts of testing | 106 |
| 5.2.1 | <i>Reduce the generation of wastes.</i> | 106 |
| 5.3 | Collect and/or dispose of all waste in accordance with environmental/quarantine requirements and enterprise procedures | 107 |
| 5.3.1 | <i>Safe storage of materials</i> | 107 |
| 5.3.2 | <i>General guidelines for the storage of dangerous chemicals</i> | 108 |
| 5.3.3 | <i>Waste disposal</i> | 109 |
| 5.3.4 | <i>General disposal procedures</i> | 110 |
| 5.4 | Care for and store equipment, used test pieces and back-up samples in accordance with enterprise procedures..... | 111 |
