Dear Mr Swart,

RE: Draft Hume Regional Growth Plan

The Construction Material Processors Association (CMPA) welcomes the opportunity to provide input into the document draft Hume Regional Growth Plan.

The CMPA is an industry association representing a broad spectrum of those involved in construction material processors businesses engaged on the extraction, processing or otherwise working in hard rock, gravel, sand masonry, clay, lime, soil and gypsum or recycling. The Association was formed more than 10 years ago in response to increasing Government demands on the industry and a need to provide a single coherent voice. The CMPA's membership is primarily small to medium sized family businesses.

Page 25

b) Explore , support and manage opportunities to take advantage of earth resources

The CMPA notes that the draft recognises the significant stone and sand resources that are critical for the construction industry. However, the sand and stone resources should be protected from encroachment into buffer zones of existing and future quarries.

Page 68

Last row

Should include "the sand and stone resources should be protected from encroachment into buffer zones of existing and future quarries."

General

Current quarries should be identified on a map together with significant sand and stone resources.

Please do not hesitate to contact me if you wish to discuss these points further.

Yours sincerely

Dr Elizabeth Gibson
General Manager
